

# CODING & ROBOTICS

## KINDERGARTEN

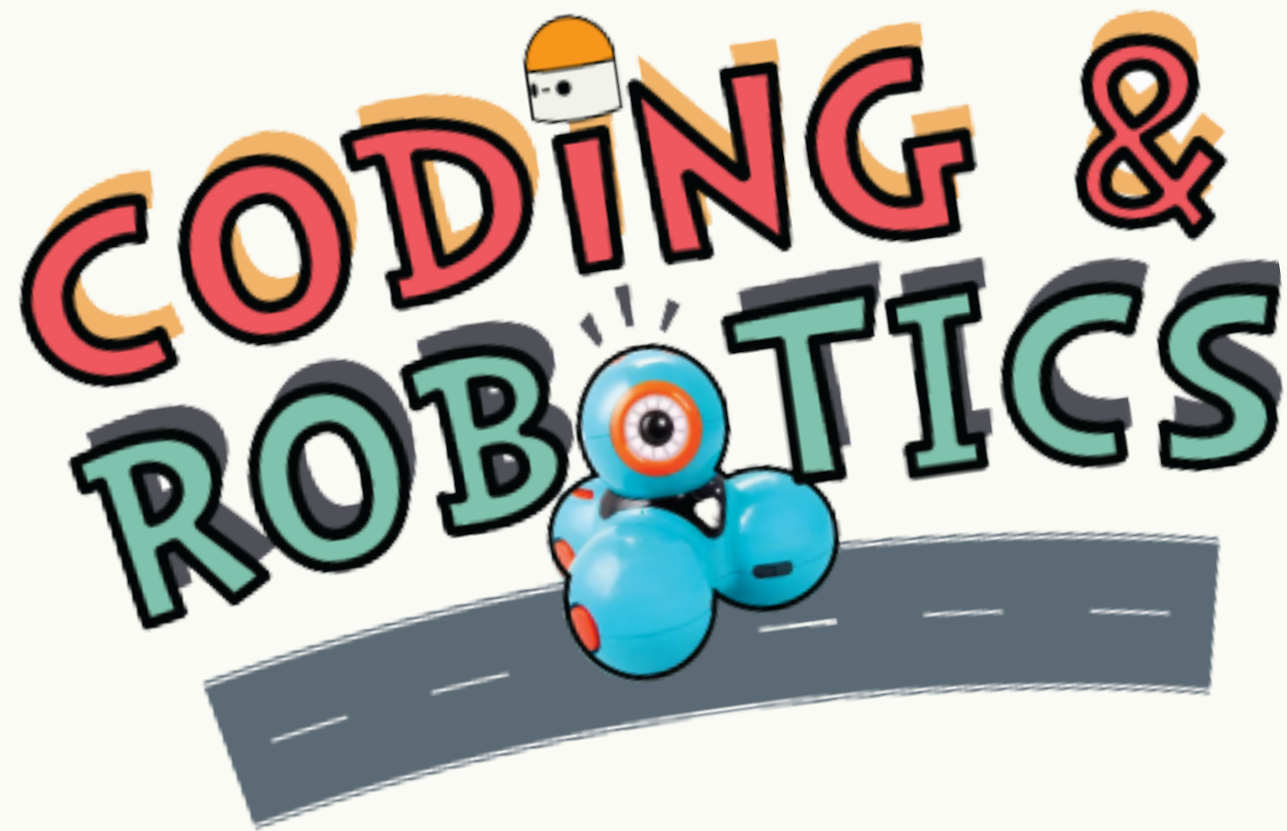

ages 5-6

### Dash

Dash is a great platform to introduce children to robotics and build on their computational thinking skills at the same time. This platform will also give them insights about logical sequencing, debugging and pattern recognition which will enhance their creativity in problem-solving. Children will also be able to grasp visual and sensory skills along with scientific and mathematics to school curriculum.

Through block-based coding, young users will be able to interact with the Dash robot. In turn, Dash responds by emitting audio and light responses to keep users engaged in their learning.

is an enrichment programme designed for preschoolers to focus on experiential learning.

Children are introduced to a different coding and robotics platform every term. Join us as we embark on new activities in each session!

## PROGRAMME BENEFITS

1. Computational thinking
2. Logical reasoning skills
3. Block-based coding
4. Problem-solving
5. Teamwork
